Amundi – Results for FY 2018 and Q4 2018  |  13 February 2019
Responsible Investment
Amundi has been a pioneer in responsible investment in France, with a three-pronged approach:
1. Application of ESG criteria in investment policies, in addition to traditional financial analysis
2. Specific initiatives, mainly concerning the environment
3. Support for the social and solidarity-based economy

ESG has become a new standard for institutional and retail investors

Amundi has a sound and well-established framework:
1. A combination of quantitative and qualitative approaches
2. Teams dedicated to ESG and voting analysis
3. A rigorous ESG rating methodology

Our three-year ambitions

ESG integration

- Mainstream the inclusion of ESG ratings in the management of our open-ended funds:
  - All actively managed funds will have a higher ESG score than that of their benchmark index or investment universe
  - Our voting policy will systematically incorporate our ESG rating
  - Assets under passive management that incorporate ESG criteria will be doubled

- Strengthen our support for institutional clients:
  - Doubling of high environmental and social impact thematic funds
  - Strengthening of our advisory role in institutional investors’ consideration of ESG criteria

- Strengthen our commitment to the social and solidarity-based economy

AuM targets

For all management strategies

- Most assets under management will incorporate ESG

Passive management

- €70bn (x2): doubling of ESG AuM

Specific initiatives

- > €20bn (x2): doubling of specific initiatives (Environment, Job Creation, Impact, etc.)

Social impact

- €500m (x2.5): Significant increase in commitments to social enterprises
Conclusion
Conclusion

1. **Growing profits in 2018…**
   - … despite the negative impact of the markets on inflow generation and revenues (management fees, performance fees, financial revenues) …
   - … which was offset by synergies and good cost control

2. **Amundi’s excellent results are a testament to the soundness and efficiency of its diversified business model (by client segment, expertise and geography)**

3. **Amundi is in a strong position to continue its profitable growth, based on the following strategic priorities:**
   - Continue to expand in each of its business lines, by taking advantage of its leadership position in the Retail networks and accelerating its penetration among institutional and corporate clients
   - Forge new distribution partnerships, in particular in Europe and Asia
   - Continue to promote its range of products and services
   - Expand its presence along the value chain, mainly by developing Amundi Services
   - Strengthen its responsible investor positioning to meet clients’ growing expectations

For Wafa in Morocco, assets are reported on a proportional consolidation basis. 2- Of which €402bn for CA and SG insurers

* Including the €6.5bn in assets reinternalised by Fineco in Q3 2018; ** including reinternalisation of an ECB mandate in Q1 2017 for -€6.9bn
Definitions and methodology (1/2)

1. **Income statement**
   - **Accounting data**
     - In 2018, the data corresponds to 12 months of activity for Amundi and 12 months of Pioneer’s activity. The twelve-month 2018 results are compared with twelve-month 2017 figures, which included only six months of Pioneer Investments.
   - **Adjusted data**
     To present an income statement that is closer to the economic reality, the following adjustments have been made:
     - 2018: restatement of Pioneer-related integration costs and amortisation of distribution contracts (deducted from net revenues) with SG, BAWAG and UniCredit.
     - 2017: restatement of Pioneer-related integration costs and amortisation of distribution contracts (deducted from net revenues) with SG and BAWAG over twelve months and with UniCredit over six months (as the contract with UniCredit did not start until Q3 2017).
   - **Combined data**
     - The combined data are different from the pro forma data (as presented in the 2017 Registration Document), which included restatements for the financing assumptions for the acquisition of Pioneer: additional financing costs, reduced financial income.
   - **Note on combined and accounting data**
     Costs associated with the integration of Pioneer:
     - 2018: €56m before tax and €42m after tax
     - 2017: €135m before tax and €88m after tax
     Amortisation of distribution contracts:
     - 2018: €71m before tax and €50m after tax
     - 2017: €44m before tax and €30m after tax

2. **Amortisation of distribution contracts with UniCredit**

   When Pioneer was acquired, 10-year distribution contracts were entered into with UniCredit networks in Italy, Germany, Austria, and the Czech Republic; the gross valuation of these contracts came to €546m (posted to the balance sheet under Intangible Assets). At the same time, a Deferred Tax Liability of €161m was recognised. Thus the net amount is €385m which is amortised using the straight-line method over 10 years, as from 1 July 2017.

   In the Group’s income statement, the net tax impact of this amortisation is €38m over a full year (or €55m before tax), posted under “Other revenues,” and is added to existing amortisations of the SG and Bawag distribution contracts of €11m after tax over a full year (€17m before tax).
